[Author 2 Full Name]

[Department],

[Organization, City, State, Country].

E-mail: [author email]

ORCID: [https://orcid.org/xxxx-xxxx-xxxx-xxxx]

[Add Author 3, Author 4 — same block, repeat as needed. Mark exactly one author as “Corresponding author” in place of “E-mail:”.]

(Received on [date]; Revised on [date]; Accepted on [date])

Abstract

[75–250 words. 9 pt, justified. State the problem, method, key results with numbers, and the practical or theoretical implication. No citations in the abstract.]

Keywords— *[3–5 keywords, semicolon-separated, 9 pt.]*

1. Introduction

[11 pt, justified. State the problem, why it matters, what gap in the literature this paper addresses, and a one-sentence roadmap of the remaining sections. Cite sources in APA style, e.g. (Author, Year).]

2. Literature Review / Related Work

2.1 [Sub-heading]

[Summarize and critically position prior work; do not simply list studies. Every claim needs an APA citation.]

2.2 [Sub-heading]

[Continue thematic grouping of related work. End this section by stating explicitly what remains unresolved — that gap is what your paper closes.]

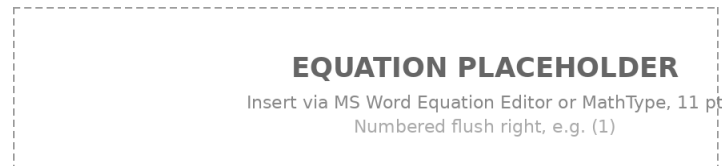

3. Methodology

3.1 [Data / Materials]

[Describe data source, sample size, collection period, and any preprocessing. Enough detail for replication.]

3.2 [Model / Approach]

[Describe the method, model, or experimental design. Equations use the MS Word or MathType equation editor, 11 pt, numbered at the right margin, e.g.:]

(1)

4. Results

[Report findings with figures/tables cited in text before they appear, e.g. “as shown in Table 1...”. Figures need 300 dpi minimum. Caption format below.]

Figure 1. [Caption — 10 pt, centered.]

Parameter	Description	Value / Unit
[Parameter 1]	[Description]	[Value]
[Parameter 2]	[Description]	[Value]
[Parameter 3]	[Description]	[Value]

Table 1. [Caption — 10 pt, centered. Cell text 8 pt: centered for numeric values, justified for text.]

5. Discussion

[Interpret results against the literature reviewed in Section 2. State limitations explicitly — sample size, generalizability, method constraints — and what a reviewer would flag if you didn't.]

6. Conclusion

[Summarize contribution in 1–2 sentences with the key numeric result. State one concrete direction for future work. Do not introduce new citations here.]

Conflict of Interest

[State any conflict, or: “The authors confirm that there is no conflict of interest to declare for this publication.”]

Acknowledgments

[Name funding sources, institutional support, or individuals who contributed but do not meet authorship criteria. State “No external funding was received” if applicable. Delete this section if not applicable — do not leave placeholder text in a submitted manuscript.]

AI Disclosure

[Disclose any use of generative AI tools — what they were used for (e.g. language editing only, not analysis or results) and confirm authors reviewed and take responsibility for all content. State “No generative AI tools were used” if applicable.]

References

[APA style, 10 pt, hanging indent, single spacing within entry, 6 pt before/after between entries. Every in-text citation must have a matching reference and vice versa. Include DOI where available. Sample entries below — replace before submission.]

Author, A. A., & Author, B. B. (Year). Title of the article. Journal Name, Volume(Issue), page range. <https://doi.org/xx.xxxx/xxxxx>

Author, C. C. (Year). Title of the book. Publisher.

Author, D. D., Author, E. E., & Author, F. F. (Year). Title of conference paper. In Proceedings of [Conference Name] (pp. xx–xx). Publisher. <https://doi.org/xx.xxxx/xxxxx>
